***Election/Restrictions***

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

To have a general inventive concept under PCT rule 13.1, the inventions need to be linked by a special technical feature. The special technical feature that appears to link claims 1-6 is a CSG, colon specific gene, wherein levels of the polynucleotide are measured in the claimed methods. Document WO 96/39419 (December 12, 1996/ IDS reference AA, filed January 4, 2001) teaches a method for diagnosing the presence of colon cancer and metastases of colon cancer in a patient by determining the level of CSG in a patient sample, see Abstract; page 1, paragraph 1; and page 14, paragraph 1. Therefore the technical feature recited in claims 1-6 is not a contribution over the prior art. Accordingly the groups set forth below are not so linked as to form a single general concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-6, drawn to methods for diagnosing, staging and monitoring colon cancer in a patient, wherein the CSG is SEQ ID NO: 3.

Group II, claim(s) 1-6, drawn to methods for diagnosing, staging and monitoring colon cancer in a patient, wherein the CSG is SEQ ID NO: 4.

Group III, claim(s) 1-6, drawn to methods for diagnosing, staging and monitoring colon cancer in a patient, wherein the CSG is SEQ ID NO: 5.

Group IV, claim(s) 1-6, drawn to methods for diagnosing, staging and monitoring colon cancer in a patient, wherein the CSG is SEQ ID NO: 7.

2. The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: As set forth above in view of the teachings from the WO document the groups are not so linked as to form a single general concept under PCT Rule 13.1 because the technical feature shared by Groups I-IV is not special. Furthermore, each sequence comprises a distinct sequence which is not shared by the other sequences and each encodes a structurally distinct polypeptide.

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alana M. Harris, Ph.D. whose telephone number is (703) 306-5880. The examiner can normally be reached on 7:00 am to 4:30 pm, with alternate Fridays off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Anthony Caputa, Ph.D. can be reached on (703) 308-3995. The fax phone

number for the organization where this application or proceeding is assigned is (703) 872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703)308-0196.
